Subject: Letter of Support for the 'SmartDrive Assist' Innovation

To Whom It May Concern,

I am writing this letter to formally express our support for the project SmartDrive Assist, developed by Ivaan Singh, Siraa Pabby, and Utsa Banerjee (Team: Tech Care Warriors).

Our NGO, The Earth Saviours Foundation (TESF), operates two full-time free shelter homes for those abandoned, forgotten, or left helpless. TESF provides 24/7 care to destitute elderly, mentally and physically disabled individuals, survivors of abuse and trauma, and people battling chronic or terminal illnesses.

In our experience, manual wheelchairs are often physically exhausting for our users, and the high cost of electric wheelchairs makes them an impossible dream for most families we serve. After interacting with the team and understanding their innovation, we believe SmartDrive Assist addresses two of our biggest challenges:

Affordability: A low-cost kit that converts existing manual wheelchairs into electric ones is exactly what is needed for low-income communities.

Reusability: The fact that the kit is movable means it can be transferred from an old, broken wheelchair to a new frame, ensuring that the family's investment is protected for the long term.

We see great potential in this concept. It provides our users with the independence to move, work, and socialise without being a physical burden on their families. We encourage the Tech Care Warriors to continue developing this project. Innovations like these are vital to ensuring that mobility is a right, not a luxury, for the poor.

We wish the team the very best.

Sincerely,

[Name & Designation]

The Earth Saviours Foundation (TESF)
